

Implementation of Nuclear Security System

- Radiation Portal Monitors for Vehicles/Cargo, designed to detect radioactive material contained in a moving vehicle.
- Portal Monitor has been specially developed for the detection of potential radioactive sources in container vehicles entering or leaving the ports/borders.
- Continuous Screening of vehicles/trucks.
- High Throughput.
- Continuous Screening of vehicles/trucks.
- Cost Effective.
- Excellent sensitivity and reliability.
- Easy-to-Operate.
- The line of detector sizes can be made to fit virtually any application.
- Radiation free.
- Highly accurate alarm analysis.
- Designed for performance in various harsh environments.

Based on the needs and requirements, Scitek will:

- Identify needs.
- Solution design.
- Deliver hardware and systems.
- Infrastructure works and installation.
- Calibration and optimization.
- Fine tuning systems.
- Training.
- Maintenance.
- Response.
